Ready for home office

we bring the booth to you

Hello and welcome

our news are....

EASYline - tune in the easy KVM World

EASYline - Features

Time for a Coffee break with Gateway2go

we celebrate - product of the year

We are winners

See you in 2021

kvm-tec Extender are made for smooth & easy connections

Ready, Go, Connect!

smart EASY

FULL HD - KVM EXTENDER OVER IP
Tune in the easy KVM World

KVM Extender DVI, DVI-D, KVM Extender USB in CATx single & dual smartEASY - the easy going KVM Extender in Full HD from kvm-tec. For point-to-point connections and smaller switching systems up to 56 endpoints. No user system necessary, embedded sound, 4 single or 4 dual in 1RU, copper and fiber, embedded sound Video Sharing and USB Sharing, Multihead

master EASY

FULL HD - KVM EXTENDER OVER IP
Tune in the easy KVM World

KVM Extender Full HD DVI, DVI-D, KVM Extender VGA & KVM Extender USB in CATx & Fiber Single & Dual

EASYline - the easy going KVM Extender in Full HD from kvm-tec. For point-to-point connections and smaller matrix switching systems up to 56 endpoints. No user system necessary, embedded sound, 4 single or 4 dual in 1RU, copper and fiber, embedded sound Video sharing, USB sharing, multihead.

... smart connections

DVI-D, USB2.0 , KVM Extender over IP
Single or Dual in CATx/copper
max resolution 1920 x 1200 @60 Hz
max distance 150m/492ft
only one cable for USB and Video
Sound embedded, Full HD Videos in real time
USB transmission rate, max 480Mbit/s
Firmware flash upgrade without cable
DVI extension without loss of quality
freeze last image Feature (red frame)
Switching included
4 Single/dual in 1 RU

All in one go

Matrix Switching Systems up to 56 endpoints without Usersystem

Bridging Easy Switching without switch

... smart connections

DVI-D, USB2.0 , KVM Extender over IP
Single or Dual in copperCATx & Fiber
max resolution, 1920 x 1200 @60 Hz
max . distance 150m/492ft
only one cable for USB and Video
Sound embedded, Full HD Videos in real time
USB transmission rate, max 480Mbit/s
Firmware flash upgrade without cable
DVI extension without loss of quality
freeze last image Feature (red frame)
Switching & VGA included
Single Units :redundant for point to point , in the Matrix Switching System with Switch
Upgrades: USB & Sound
4 Single/dual in 1 RU

All in one go

Matrix Switching Systems up to 56 endpoints without Usersystem

Bridging Easy Switching without switch

KVM can be so simple

All in one go

Matrix Switching Systems up to 56 endpoints without Usersystem

Bridging Easy Switching without switch

Easy Cross Move Softwarefeature

both PCs can be operated with one mouse and one keyboard

2 local Units + 1 remote Unit = Easy Cross Move with 1 keyboard & 1 mouse

Let's connect

With *Frontbridging* 2 Local EASYline Extenders can be bridged to 1 remote dual Extender (2 network sockets) & thus one or two screens can display the contents of the PCs simultaneously with different images and can be operated either right or left.

2 local single Units + 1 remote dual Unit = Bridging or Switching on 1 or 2 screens

With *Backbridging* from one dual local extender can be shared to two single remote extenders. For all applications that require monitoring at different locations

1 dual local Unit + 2 remote Units = Bridging or Sharing on 1 or 2 screens

FULL HD - KVM EXTENDER OVER IP
Tune in the easy KVM World

kvm-tec Extender are made for smooth & easy connections

Ready, Go, Connect!

The required bandwidth is reduced by a special bandwidth management and therefore remote working in almost real time is possible. Gateway2 go is connected to the Internet via VPN tunnel and can therefore be connected from the remote workstation to any PC in the matrix switching system.

Operating system Windows 10, bandwidth 70Mbit/s for desktop working, 500 Mbit/ for smoothes video playback

License model for remote workplaces

Monthly licenses are booked on demand, making the Remote Workplace very cost effective and efficiently covering peak times.
